## PERSONAL PROJECTS

---

### Real-time Currency Converter :

The Real-Time Currency Converter is a web app that provides instant, accurate currency conversions with a user-friendly interface. JavaScript retrieves current exchange rates via API, calculates conversions, and dynamically displays results in real-time.

- Technologies used : HTML, CSS, JavaScript

Github Repo - <https://github.com/klnlokeshkumar/Currency-Converter>

### Movie Recommendation System :

The Personalized Movie Recommendation System uses content-based filtering to analyze movie attributes like genres and descriptions, generating real-time, tailored recommendations based on user preferences through data processing and similarity measures.

- Technologies used : Numpy, Pandas, Scikit-Learn

Github Repo - <https://github.com/klnlokeshkumar/movie-recommendation-system>

## CERTIFICATIONS

---

- |   |          |
