## PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in developing RESTful applications using Java, Spring Boot, and PostgreSQL. Builds secure authentication with JWT, improves database performance, and delivers reliable, scalable software solutions. Collaborates effectively in Agile teams and focuses on writing clean, maintainable code.

## WORK EXPERIENCE

- Software Engineer - CapgeminiJune 2025 - Present
- Developed and maintained RESTful APIs using Spring Boot and Java, ensuring efficient data flow between microservices and database systems.
  - Implemented JWT-based authentication and authorization using Spring Security for secure client-server communication.
  - Designed and optimized PostgreSQL queries and entity relationships, improving data retrieval performance.
  - Collaborated in Agile sprints, performing code reviews and contributing to CI/CD pipelines for smooth deployments.

## TECHNICAL SKILLS

- |                 |   |
|-----------------|---|
| Backend         | Java, Spring Boot, Spring Security, REST APIs, JWT Authentication, JPA/Hibernate, Microservices, Maven, JUnit |
| Databases       | PostgreSQL, MySQL, MongoDB  |
| Developer Tools | Git, GitHub, Docker, Postman, CI/CD   |
| Familiar With   | Python, C++, React.js, FastAPI, Docker Compose  |

## PERSONAL PROJECTS

- MoneySnap – Expense Tracker | *React.js, Spring Boot, PostgreSQL, JWT*GitHub Link
- Developed a full-stack expense tracker with JWT-based authentication.
  - Designed and implemented RESTful APIs in Spring Boot for transactions, categories, and user data.
  - Integrated React front-end with backend APIs for real-time expense tracking and data visualization.
  - Designed relational database schema in PostgreSQL to ensure efficient storage and retrieval of financial data.
- Hotel Management System | *Spring Boot, PostgreSQL, JPA, JUnit*GitHub Link
- A role-aware booking back-end enabling customers, managers, and administrators to sign up and log in securely.
  - Designed a room reservation workflow with live availability checks and conflict prevention.
  - Exposed clean, versioned REST endpoints documented via Swagger, and architected a normalized database schema.
- Antivirus Detection System | *FastAPI, ClamAV, MongoDB, Docker*GitHub Link
- Developed a FastAPI service that integrates ClamAV to scan uploaded files for malware in real time.
  - Stored scan logs and results in MongoDB for efficient tracking and retrieval.
  - Containerized the API, ClamAV engine and MongoDB using Docker to ensure portability and scalable deployment.

## EDUCATION

- Gayatri Vidya Parishad College of Engineering (A)2021 - 2025
- Bachelor of Technology in Computer ScienceCGPA: 8.82

## CERTIFICATIONS

- |  |          |
|--|----------|
| Data Structures & Backend with Java - Board Infinity | Sep 2025 |
| MongoDB Developer's Toolkit - GeeksforGeeks          | Aug 2024 |
| Python Foundation - Infosys Springboard              | Feb 2023 |

## ACHIEVEMENTS

- TCS CodeVita Season 12 Global Rank — 1487
- Leetcode: [klnlokeshkumar](#) — Top 20%

## POSITIONS OF RESPONSIBILITIES

- Membership Coordinator – IEEE SB GVPCE (A)
- Class Rotaract Representative - RACGVP
